=====

SCREWBALL

=====

THE OBJECT OF THE GAME

You are **SCREWBALL** and you have 60 secs to change the colour of all the squares that surround you. Menacing you all the time, however, are the **BLACK BUGS**.. and they sure are mean! They even cheat by not walking on the squares!!

If they catch you then I'm afraid you lose a life.

Kill the **BUGS** by digging holes for them to fall through!!

If you are really in a fix then as a last resort you may **HYPERSPACE** to the top of the grid...But you won't always survive the journey!!
